ABOUT US

Prowess Security System (PSS) was established in 2018, specialising in the supply, design, installation and maintenance of Electronic Security & Surveillance Systems. We are an operating division of Prowess Technologies. Following a full assessment of your business or premises, our skilled sales team will design an optimal security solution tailored to your needs. Our dedicated operations managers and certified technical teams are involved in each step including successful installation, programming and final handover.

Our client base includes homes, schools, small and medium businesses as well as blue chip companies in the logistics and warehousing, retail and food, education, manufacturing and many more business sectors.

Executive Summary

OUR MISSION

- To be the predominant provider of electronic security systems and associated electronic security systems and solutions at competitive prices, while providing unquestionable levels of service excellence and ultimately reducing our clients operating costs while providing peace of mind.
- Deliver world-class security & safety solutions that meets the client's needs for a real return on investment & business development.
- Distinguish Prowess Security Systems as sole provider of high quality & efficient systems that meet customer needs and lead to better ROI; safer and more secure environments.
- We understand the customer needs and utilize the latest technologies to serve our customers at reasonable prices.
- At PSS, we pride ourselves in our after sale service with precedence to providing effective solutions to our clients.
- We believe that even with the top of the range equipment, the solution is only as effective as the company that backs it up.

CORPORATE VALUES

- **Professionalism:** Through cooperation with high-end suppliers, we strive to deliver the most professional solutions on the global market to our customers.
- **Security:** The feeling of safety goes hand in hand with the feeling of comfort and prosperity, and we therefore understand very well the need of our customers to have their property out of harm's way. We consider it our mission to ensure this feeling.
- **Modernity:** There is no room for obsolete systems when protecting property, technology and information. We endeavour to remain up-to-date with the latest developments and offer our customers cutting edge security system solutions. Our employees are continually educated and trained in the latest practices and technology.
- **Care:** Handover of the security system to the client is not the end of its story. Hence we offer a first class maintenance service for our security systems.
- **People:** Our Company consist of people, who build it. For our customers and suppliers, we aim to ceate conditions that allow them to work efficiently and comfortably.

Executive Summary

CORPORATE VALUES

- **Individual approach:** Our security designs are based on the customers' needs while respecting the specifics of the premises. We are therefore capable of protecting administrative buildings and commercial premises equally well as manufacturing facilities (cement works, manufactories of light bulbs and automobile components, electrical substations), while fully respecting the individual needs of our clients.
- **Data protection:** There is no room for error when protecting property. Our clients' data and privacy is therefore protected as thoroughly as their property is protected by our security systems.
- **Responsibility:** We believe that the prosperity of a company cannot be based solely on individuals. The same level of responsibility lies with private companies. We therefore strive to conduct our business in such manner to build a bright future for the following generations.

HIGH DEFINITION CCTV SYSTEMS

Protect your business from theft, vandalism and intruders with our comprehensive video surveillance systems and CCTV systems. From CCTV design, planning, installation and maintenance through to technical support 24 hours a day, 7 days a week on a national basis. We pride ourselves on being at the very forefront of technology. From Full HD & smart IP Network based CCTV through to AI Video Analytics, ANPR (Automatic Number Plate Recognition) Solutions as well as mobile device viewing & control of your installed cameras through ISP connectivity.

ACCESS CONTROL SYSTEMS (BIOMETRIC FINGERPRINT & MAGNETIC CARD SWITCHES)

At the heart of any security system is your access control - Questions on who has access to the premises, why and when are always asked. Our options include facial recognition, Biometric and Card access terminals connected to bespoke door locking systems coupled with PC Server software to keep your points of access secure and monitored.

INTERCOM & DOOR ENTRY SYSTEMS

Visitor identification is vital to completing your door entry solution. We install Video & Audio Intercom systems through a 2-Wire or IP Network infrastructure. Our expert consultants will advise on the various options and install to your exact requirements.

VEHICLE TRACKING AND FLEET MANAGEMENT SOLUTIONS

Always know where your vehicles are, in real time. Whether your drivers are parked or on the move, get their precise, mapped location with our vehicle tracker. This can help with proof of delivery and allows you to monitor working-time guidelines compliance. Identify where to make savings by comparing previous trips. Improve customer experience with precise ETAs. Respond quickly to customer emergencies by sending the driver with the quickest Estimated Time of arrival (ETA). Also helps you monitor driver's behaviour such as harsh braking, over speeding, geo fencing etc.

INTRUDER ALARM SYSTEMS AND OUTDOOR BEAMS

Whatever your industry - commercial, retail, healthcare, financial, education, government or another - Prowess Security Systems understands that each business has its own unique needs, and our security experts will work with you to design, install and monitor an effective intrusion system that's tailored to your requirements. We have a complete range of approved alarm systems, motion detectors, magnetic contacts and sensors including wireless technology and integration with access control.

ELECTRIC FENCE & AUTOMATED GATE AND GARAGES

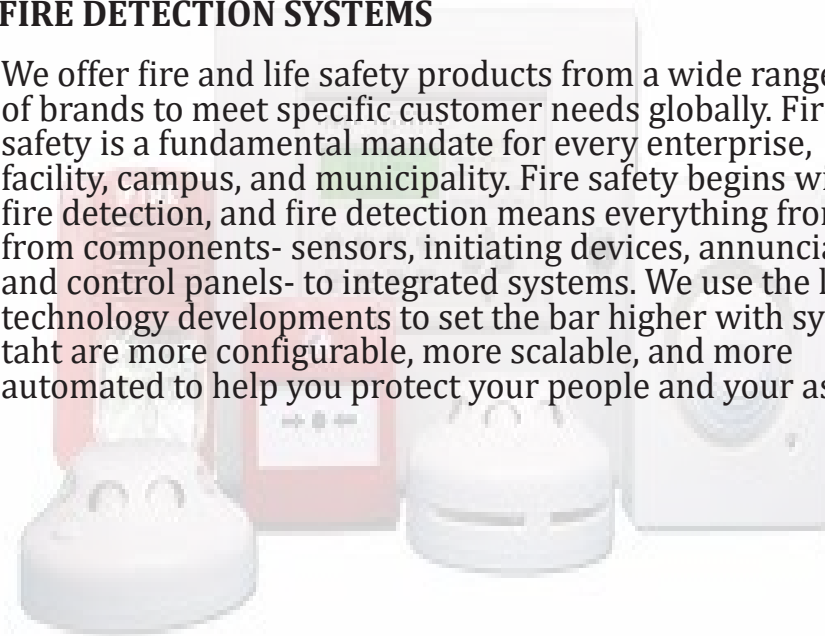

Electrified fencing is the most important component of your Complete Security System. It secures and monitors the "First line of defence", the perimeter of the property. Not only does the electrified fencing serve as a physical and psychological barrier, but also as a perimeter alarm system. It is proactive rather than reactive as it stops perpetrators before they enter your property.

FIRE DETECTION SYSTEMS

We offer fire and life safety products from a wide range of brands to meet specific customer needs globally. Fire safety is a fundamental mandate for every enterprise, facility, campus, and municipality. Fire safety begins with fire detection, and fire detection means everything from components- sensors, initiating devices, annunciators, and control panels- to integrated systems. We use the latest technology developments to set the bar higher with systems that are more configurable, more scalable, and more automated to help you protect your people and your assets.

EXPERTISE

Prowess Security System is a trusted Advisor and supplier to companies, Non-Governmental Organizations and government institutions to help build, implement and manage their Networked systems and applications, Prowess Security Systems delivers security solutions to companies, schools and NGOs.

Importantly, Prowess Security Systems partners with best in class technology vendors to provide cost-effective end-to-end security solutions, including computer software related issues and CCTV.
